## ENJOY THE OLDEST EUROPEAN TEA.

### OFFERING GORREANA IS OFFERING HISTORY WITH AROMA.

Founded in 1883 and located in Azores, the Gorreana tea factory is the oldest in Europe. The same family has been managing the planting area of 45 hectares for about 5 generations.

Gorreana teas represent a union of taste, health and ecology.

Gorreana teas have worldwide recognition and are ranked as some of the best and purest teas in the world.

### BLACK TEA

The black tea Pekoe has a very strong and aromatic flavor. It is produced from the plant's second bearing bud. Due to the strong oxidation of *Camellia Sinensis* leaves, this tea displays a reddish and dark color and it also contains antioxidants, neuro-stimulants and caffeine.

### GREEN TEA

The spraying process of *Camellia Sinensis* leaves enhances its light and delicate aroma. This tea has great anti-oxidant and slimming effects, anti-cancer properties and in anti-aging.

# QUALITY PRINTING SERVICES

## EMBROIDERY

- The well-known embroidery technique allows customization on good quality fabrics with great quality and perfection. Embroidery replicates designs with a large variety of colours and distinct lines.
- Used on: towels, blankets, caps, conference bags.

## HOT STAMPING

- Hot stamping consists of reproducing designs by means of a hot press on leather or imitation leather products. Furthermore, this technique allows transferring a metallic or pigment finish, adding colour to the branding.
- Used on: key rings, diaries, notebooks, wallets.

## DOMING

- Doming consists of applying a clear resin (epoxy) on a printed slip. This layer of resin produces the effect of depth and protection and results in a 3D effect. The end result is shiny, resistant and durable.
- Used on: Usb flash drives, key rings, pens.

## LASER

- Laser engraving is a precise and long-lasting method. The laser beams engrave the design on hard surfaces. Besides metal, it can also be used on wood, leather/PU and glass with exquisite and elegant results.
- Used on: metal pens and key rings, wooden containers, card holders, cork products.

## SCREEN PRINTING

- Screen printing is a printing technique which provides trustworthy and long-lasting results. This method can be used on smooth surfaces; printing in high definition even with more than one colour.
- Used on: notepads, rulers, pill boxes.

## ROTARY SCREEN PRINTING

- Rotary screen printing is similar to the process of screen printing, but optimized for 360° printing. This process is indicated for pens.
- Used on: pens.

## TEXTILE PRINTING

---

- A method similar to silkscreen printing, however optimized to be used on textiles.
- Used on: aprons, polar fleece items, non-woven bags and clothing.

## SUBLIMATION

---

- Sublimation offers the advantage of being able to be used on concave surfaces, producing well-defined designs. It also results in a design highly resistant to extreme temperatures.
- Used on: mugs

## PAD PRINTING

---

- Process used mainly for printing small objects like pens. It is very versatile and adapts to curvy shapes. It is the most economical solution for various products.
- Used on: plastic pens, USB flash drives, key rings.

## TRANSFER

- This method enables results on various types of fabrics and is very economic for multicolour printing on small quantities.
- Used on: aprons, bags, backpacks, non-woven bags, cork, footballs.

## DIGITAL TRANSFER

---

- Transfer process optimized for digital printing of small quantities, without colour limits.
- Used on: folders, backpacks, non-woven bags, cork products, soccer balls.

## DIGITAL UV

---

- UV printing offers great advantages like speed and high quality guarantee. This technique is very appealing for printing in several colours. Ideal for small quantities and can be applied on plain or slightly curved surfaces.
- Used on: pens, keyrings, rulers, notebooks.
